Acknowledgements

This paper wouldn't have been possible without the following people: I want to thank Beatriz Busaniche, Federico Heinz and Fernanda Weiden for sharing their expertise; the lecturers at WOS 3 for planting the seed of this master's thesis in my head; the lecturers at "download culture?" for giving me some more inspirations; the contributors of the WSIS- Wafi- and FOSS-pdi-mailinglists and pro-Linux newsletter for providing me with valuable information.

Extremely special thanks goes to Axel Dürkop and Yvonne Mattern for the transcriptions (you are true heroes!) and to Anna Schlosser and Karsten Gerloff for proof-reading and valuable comments. I want to thank my parents for EVERYTHING (my mother especially for the Wednesdays).

And the Oscar goes to... *Axel*. For sharing the summer and everything else with me.
